

New electronic service in Dimitrovgrad Municipality

Monday, 18 January 2021

Dimitrovgrad Municipality has activated a new electronic service "9000 Application for payment of a fine electronically", which can be requested, as through the website of the municipality, section electronic services <https://www.dimitrovgrad.bg/bg/elektronni-uslugi> - Local taxes and fees, as well as through the Portal for access to electronic administrative services of the agency - www.egov.bg. It is necessary for the citizens to have a profile in advance in the System for secure electronic delivery - <https://edelivery.egov.bg/>. There the applicant will receive a notification of the payment due to the selected municipality. The easier option is to request the service directly from the registered account. After selecting the specified address, the applicant activates the "Login" button and enters his account with a qualified electronic signature. With this, he practically performs his electronic identification. The "Request eService" option can be activated from the account. Activating the selected service opens a screen with clear instructions for the process sequence.

A good sign is the fact that 2021 begins with the completion of the list of electronic services. Moreover, the ten-month restrictions due to the COVID 19 pandemic proved the indisputable need for them.
