

THE MUNICIPALITY OF DIMITROVGRAD IS PROSPECTING CITIZENS' INTEREST IN REPLACEMENT OF SOLID FUEL HEATING DEVICES FOR THE NEW PROGRAM PERIOD

Friday, 9 December 2022

Dimitrovgrad Municipality is a potential candidate under the new Environment Program 2021-2027 to improve air cleanliness by replacing household solid fuel heating appliances with ecological alternatives.

The implementation of this measure needs **preliminary information** on the wishes of citizens to replace their wood and coal appliances with environmentally friendly ones:

1. Air conditioners;
2. Devices which use pellet.

We expressly emphasize that with this announcement we

are collecting information only for declared preliminary interest from the residents of the municipality. After the start of the procedure, the actual collection of Application Forms and accompanying documents for the replacement of the heating appliances will take place.

Those who wish to take advantage of the possibilities of replacing the heating appliances in the future, please complete the information in the submitted Application of Intent. **The application for intent does not bind the citizens to apply for the replacement of the heating appliances.** However, the submitted information will assist the municipal experts in starting the project process and justifying the needs for new heating appliances.

The information can be provided by the citizens **until January 31, 2023** in one of the following ways:

- filled in online on the website of Dimitrovgrad municipality;

or

- on paper at the following address: 6400, Dimitrovgrad municipality, Rakovski No. 15 Blvd., Counter No. 1, every working day from 08:30 to 17:00.
